Build Block 2

This block is designed to improve the skill of the movement pattern AKA the general strength of the squat, hinge, push and pull, which will translate to the next cycle of training when you're pushing higher volume intensity. This cycle should feel challenging without being soul-crushing.

Building base-level strength is not about taking every set to failure but progressing the load you do each week while working to an RIR of 1-2.

Loading: keep loading at 8/10 (80-90%) of what of each set.
